

AN IDEA WHOSE TIME HAS COME

BAJAJ AUTO - THE WORLD LEADER IN FIRST AND LAST MILE TRANSPORTATION.

The Bajaj RE is the most trusted 3-wheeler brand in the world. Over 58 million passengers travel in a Bajaj RE across the world every day.

Sold in over 25 countries, the Bajaj RE is the most popular vehicle for first and last mile transportation. Known as Bajai in Indonesia, Bajaj in Sri Lanka, Keke in Nigeria, Hind Tuk Tuk in Egypt, Torito in Peru and Motocarro in Mexico, the Bajaj RE is loved the world over. Providing livelihood to thousands of drivers, fleet owners, mechanics and dealers alike.

INTRODUCING QUTE – AN IDEA WHOSE TIME HAS COME.

Having already established itself as the most trusted three-wheeler brand in more than 25 countries, Bajaj has pushed the boundary of innovation in intra-city transportation with Qute – a compact quadricycle.

Qute is an eco-friendly, fuel efficient and economically competitive vehicle for first and last mile transportation. What's more, it's a safe and affordable mode of transport for the commuter and provides employment for drivers and fleet owners.

MAKING OF QUTE.

The Qute has been rigorously tested on multiple parameters, terrain and weather conditions in India. From the hot deserts of Rajasthan to the cold altitudes of the Himalayas, from rural roads to city traffic, Qute has been put through over 3.2 million kms of testing. These tests check for structural durability, suspension, performance, handling, efficiency and all forms of abuse. Qute is made at a state-of-the-art assembly plant that uses the latest robotics for precision manufacturing. The entire process is supervised and quality checked by expert engineers.

POWERED BY WORLD-CLASS DTS-i TECHNOLOGY.

DTS-i ENGINE

Digital Twin and Triple Spark Ignition system is a patented Bajaj Auto technology that ensures optimal combustion of air fuel mixture leading to better performance, greater efficiency and lower emissions.

BETTER PERFORMANCE

Qute is small in size but zippy in performance. With an output of 13.46 Ps power and 19.6 Nm torque, Qute can surprise you with its ability to go up inclines and carry small loads.

LOW ON EMISSION

Sample the specifications. It emits just 66 gms/km* of CO₂ – 40% lower than any other car. Now, that's a vehicle for a greener planet.

HIGH ON EFFICIENCY

Qute is powered by a 4 valve liquid-cooled DTS-i engine with closed loop Fuel Injection system, which combined with its light weight, gives it a fuel efficiency of 36 kmpl* – 60% more than most popular small cars.

SMART & SENSIBLE DESIGN.

RIGHT SIZE

Weighing at just 399 kgs, it's compact dimensions, makes Qute the right size to weave through traffic and park anywhere.

EASY MANOEUVRABILITY

With a turning radius of just 3.5 m, Qute is very easy to manoeuvre in dense traffic conditions.

TURNING RADIUS 3.5 M

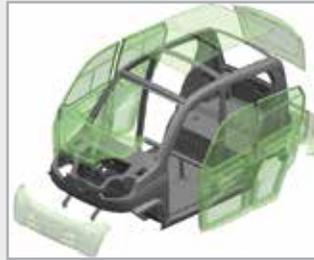

GREAT COMFORT

Qute has been designed with great ergonomics for both driver and passengers. The strong suspension and ergonomic seats provide great comfort for your daily commute.

HIGH ON SAFETY.

MONOCOQUE BODY

Qute has a high strength, monocoque body and impact-resistant plastic closures and doors. Apart from this a hard rooftop, front and rear seat-belts and a restricted top speed of 70 kmph, provide ample safety for the occupants.

SPACE. AND MORE SPACE.

Qute has ample storage space for your luggage. 191 litres, to be precise. And the options are spread all across - in the front bonnet, glove box, under the seat and rear. But wait. If you fold the rear seats, you get a whopping 850 litres of space. Over and above this there are roof rails to carry extra luggage. Whichever way you look at it, the Qute is smart, practical and incredibly multipurpose.

FAMILY VEHICLE

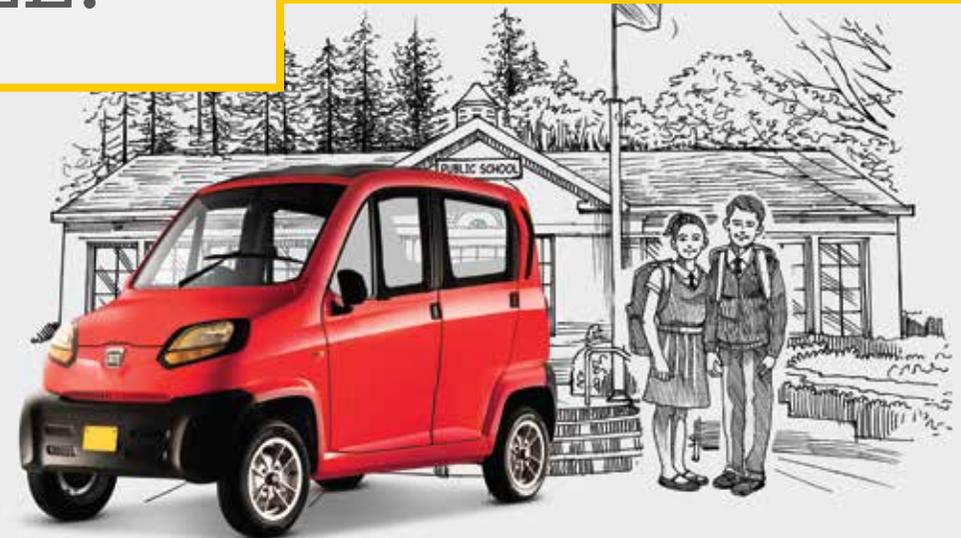

TOURIST VEHICLE

A TRULY
VERSATILE
VEHICLE.

PASSENGER CARRIER

SCHOOL TRANSPORT

The Qute is designed to be a versatile vehicle that can suit multiple first and last mile transportation needs. Use it as a regular taxi in a crowded metro city or as a personal vehicle in a rural town. Take advantage of its cute looks to turn it into a tourist vehicle or to drop kids off to school. It's incredibly versatile and it is all up to your imagination!

SPECIFICATIONS.

ENGINE	217cc Petrol
TRANSMISSION	Constant Mesh Manual 5 Forward 1 Reverse
MAX SPEED	70 kmph
KERB WEIGHT	399 kg
SEATING CAPACITY	Driver + 3
LENGTH	2752 mm
WIDTH	1312 mm
HEIGHT	1652 mm
WHEEL BASE	1925 mm
WHEEL TRACK	1143 mm
GROUND CLEARANCE	180 mm - Unladen
TURNING CIRCLE RADIUS	3.5 Metre

Qute is the first Indian made
Quadricycle to meet European
Quadricycle norms and get the
European WVTA (Whole Vehicle
Type Approval) certification
awarded by RDW Netherlands.
